

Healthy Grow Infused with Holganix

healthygrowpro.com | holganix.com 

Take Your Turf to the Next Level

It's really no secret that plants use probiotics in the same ways that humans do. Healthy Grow® infused with Holganix® is Aerobically Composted Chicken Manure (ACCM) infused with a probiotics "compost tea" that promotes beneficial microbial activity in and around the soil and plants.

It's an all-natural, slow release, non-burning organic blend rich in humates, endo- and ecto-mycorrhizae, carbohydrates and trace minerals, naturally creating a robust soil environment that results in strong turf and plants that are less susceptible to environmental and disease pressures. Plus, the Iron Sulfate provides beautiful dark green color without the flush growth from conventional chemical fertilizers.

Healthy Grow infused with Holganix contains no heavy metals or human bio solids. And because it's fully composted, you don't get the odor problems normally associated with manure-based composts.

By combining Holganix with the power of our trusted Healthy Grow Professional fertilizers, we've created a super product that fosters the development of a microbiological soil community, and in turn, provides a more sustainable solution for the unpredictable future of the green industry.

The plants are loving it, and we know you will too.

Benefits

Promotes green thick growth

Stimulates microbial activity

Improved root depth and density

Enhances water holding capacity

Increased nutrient uptake efficiency

Application Rates

GREENS, TEES, & OTHER FINE TURF

» Apply 3.4 to 4.6 lb of product per 1,000 sq ft to deliver 0.34 to 0.46 lb of N per 1,000 sq ft

FAIRWAYS, ROUGHS, & RESIDENTIAL LAWNS

» Apply 150 to 200 lb of product per acre to deliver 0.34 to 0.46 lb of N per 1,000 sq ft

Use recommended rates above to apply 3 to 4 oz equivalent of Holganix Bio 800+ per 1,000 sq ft. Apply up to 12.5 lb per 1,000 sq ft to deliver 1 lb of N per 1,000 sq ft.

USE PRECAUTIONS

Apply to dry turf. Always calibrate spreader to ensure proper application. Irrigate to move product down into the turf canopy before mowing.

DIRECTIONS FOR USE

Use during the active growing season to achieve soil test goals and/or desired aesthetic results.
