

1. Flow desired amount of Holganix into Cone Tank from the RAD unit (See RAD instructions).
 2. Add extras to Cone tank(Pre-M, Insecticide, etc).
 3. Hook Banjo quick connect to truck tank. 
 4. Turn on Water Supply Pump Switch. 
 5. Turn on Cone Discharge Valve (#2).
 6. If Rinse Valve (#1) is closed, turn on to clean Cone Tank.
 7. When Cone Tank is clear, shut off switch #1 and #2.
- *** If applicable: After cone tank is emptied, use Bypass Switch #3 to flow a higher volume, for a faster fill. Be sure to shut off valve before turning off Water Supply Switch. NOTE: Valve #1 & #2 should never be open at the same time.*
8. When truck tank is full, turn off Water Supply Pump Switch, and close valve on the TRUCK END of hose.

RINSE VALVE (#1) 

CONE DISCHARGE VALVE (#2) 

BYPASS VALVE (#3) 

Valve ON is when lever is parallel to fluid line.

Valve OFF is when lever is perpendicular to fluid line.
