- Q&A
- Audience Polls Throughout

---

# **HOLGANIX**

# **PROGRAMS**

---

No matter the product or program, Holganix focuses on soil biology as the solution to plant health.

# Tip One

How Do You SAFELY Get  
Summer Color?

## PB1 Product

Holganix PB1 LTO 4-0-2 is a targeted plant probiotic that:

- Enhances color response
- Optimizes fertilizer efficiency
- Increases plant health
- No refrigeration required

PreBiotic Fertilizer

Holganix Blue Sky 21-0-0 is a slow-release nitrogen fertilizer that:

- Provides a pop of color
- Promotes steady growth throughout the season
- Feeds the soil ecosystem

# Tip Two

Look for Summer Disease

## **Summer Disease Watch**

- Foliage color
- Fungicides can be costly
- Build plant resilience with Bio 800+ products

Bio 800<sup>+</sup> Product

**Holganix Lawn** is an organic, living  
Plant probiotic that:

- Builds turf resilience/strength
- Develops root growth
- Enhances seed germination
- Reduces the need for fertilizers, pesticides and water

UltraGreen

## UltraGreen Lawn Care

“We’ve seen about 50% less disease pressure than in previous years when using Holganix Lawn alongside reduced amounts of fungicides”  
– Caleb Ault, CEO of UltraGreen

# Tip Three

## Look for Insects

## Watch for Insects

- Grubs, chinch bugs, cut worms, army worms, sod web worms
- Preventative care
- Curative care
- Building plant strength

# **Tip Four**

## Mowing Practices

---

## Mowing Practices

---

- Don't cut off more than 1/3<sup>rd</sup> of the grass blade
- Mowing blades are sharp
- Change mowing directions
- If dormant, don't mow

# **Tip Five**

## Irrigation Practices

# Irrigation Practices

- Don't overwater
- Understand the soils in your area
- Water in with penetration to the soil at 6-8 inches in depth
- Contact your distributor rep for additional recommendations

# **Bonus Tip**

Download Your Soil Smart Program
