HOLGANIX BLOOM TESTIMONIAL

“I’ve been using Holganix Bloom for the last two years,” explains Mark Van Buren, owner of Zehrs On The Lake - a nursery in the Niagara region. “There’s an extremely low cost associate with the product so I put Bloom on all of my plants!”

According to Mark, Holganix Bloom is like “wrapping my plants in armor!” Not only has it allowed him to produce a healthier plant, but also Holganix Bloom helps protect the plant from stress.

“I would recommend Holganix Bloom to any grower,” assures Mark. “There’s a tremendous amount of science behind Holganix products and at the end of the day, the proof is in the plants!”

HOW DOES HOLGANIX BLOOM WORK?

1

Microbes, including Plant Growth-Promoting Bacteria and Mycorrhizae, stimulate healthy growth in plant foliage and roots.

2

Microbes convert and release nutrients (plant food) to the plant.

3

Microbes promote the plant's tolerance to stress, including weather and traffic.

4

Microbes balance the soil ecosystem, providing a happy habitat for happy plants.
