

BECAUSE EACH BLADE OF GRASS & GRAIN OF SOIL IS PART OF YOUR *Masterpiece*

Holganix Golf provides a complete microbiome with over 800 species of active, diverse microorganisms to promote:

↑ Soil health

↑ Root depth & density

↑ Nutrient efficiency

↑ Thatch reduction

↑ Recovery time
& playability

↑ Tolerance to stress from
weather & traffic

BROKEN SOUND CLUB

HOLGANIX GOLF TESTIMONIAL

Shannon Easter, Director of Golf Maintenance and Environmental Consultant at Broken Sound Club uses Holganix Golf religiously. What are Shannon's favorite Holganix Results?

Reducing Inputs: Shannon has reduced fertilizers by 20% and fungicides by 30%. He also reports a 12 - 13% reduction in irrigation.

Enhanced Root Quality: "We've seen a 50% increase in mass and density."

Improved soil quality: Shannon reports a 17% average increase in cation exchange capacity on fairways and a 27% increase on greens.

HOW DOES HOLGANIX GOLF WORK?

1

Microbes including Plant Growth Promoting Bacteria and Mycorrhizae, stimulate healthy growth in plant foliage and roots.

2

Microbes convert and release nutrients (plant food) to the plant.

3

Microbes promote the plant's tolerance from stress, including weather and traffic.

4

Microbes balance the soil ecosystem, providing a happy habitat for happy plants.
