HOLGANIX PB1 LTO TESTIMONIAL

“I like to do things differently and I think that biological products are the way of the future,” says Rick Ritenour of Ritenour Custom Lawn Care.

But for Rick, convenience was extremely important. That’s why he was drawn to PB1 LTO.

Overall, Rick has seen two key benefits:

- 1. A pop of green when combined with fertilizer products.**
- 2. Faster seed germination when applying PB1 LTO to his aeration and overseeding program.**

HOW DOES HOLGANIX PB1 LTO WORK?

1

Bacteria assist with nutrient and water uptake. Microbe food supports the soil biology.

2

Armament™ Technology enhances nutrient uptake and builds plant resilience.

3

Amino acids support plant resilience from environmental stress and increase color response.
