## Microsoft Conferencing Solutions

Many organizations have seriously outdated collaboration spaces that make it difficult to stay competitive. Collaboration is critical for driving innovation, creativity, and decision making – all of which impact the bottom line. As we work in distributed teams more often, we need virtual and physical places that allow us to see our teammates comfortably, hear each other clearly and share information easily.

If you're standardized on Microsoft or Skype for Business, you're in good hands. We offer a suite of solutions to accommodate all different kinds of collaboration spaces – from huddle rooms to work cafés.
Red Thread + Microsoft + Steelcase

Microsoft and Steelcase's collection of immersive Creative Spaces brings people, space and technology together to generate new ideas and move them forward. With Red Thread's audiovisual expertise and expanded portfolio of collaboration technology, we can make any space a creative space.

Optional Cameras

Meeting Owl is a 360° all-in one audio and video conferencing device. Its intelligent software provides a panoramic view of the room and automatically focuses on the active speaker.

Ideal for small-medium spaces.

Polycom Eagle Eye Director uses automatic people-tracking technology for an engaging, natural meeting experience. It automatically zooms in on the active speaker and identifies everyone within the room.

Ideal for larger environments.

Vaddio RoboSHOT 20 UHD is a 4K pan/tilt/zoom camera that offers pristine image quality and outstanding low light performance. It provides IP streaming and network control via a web interface.

Ideal for medium and large spaces.
