## Mixed Conferencing Solutions

Many organizations have seriously outdated collaboration spaces that make it difficult to stay competitive. Collaboration is critical for driving innovation, creativity, and decision making – all of which impact the bottom line. As we work in distributed teams more often, we need virtual and physical places that allow us to see our teammates comfortably, hear each other clearly and share information easily.

If you're not standardized on a major platform, you have a multitude of options to choose from. On the next page we feature our recommended agnostic solutions that accommodate different kinds of collaboration spaces – from meeting rooms to boardrooms to work cafés.

### TYPES OF SPACES

Huddle Rooms

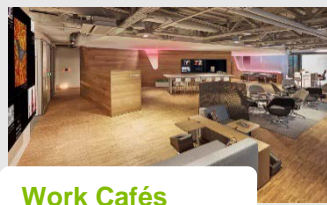

Meeting Rooms

Boardrooms

Multipurpose Rooms

Work Cafés

Optional Cameras

**Meeting Owl** is a 360° all-in one audio and video conferencing device. Its intelligent software provides a panoramic view of the room and automatically focuses on the active speaker.

Ideal for small-medium spaces.

**Polycom Eagle Eye Director** uses automatic people-tracking technology for an engaging, natural meeting experience. It automatically zooms in on the active speaker and identifies everyone within the room.

Ideal for larger environments.

**Vaddio RoboSHOT 20 UHD** is a 4K pan/tilt/zoom camera that offers pristine image quality and outstanding low light performance. It provides IP streaming and network control via a web interface.

Ideal for medium and large spaces.
