MGH Institute of Health Professions creates a state of the art high-tech medical training facility.

MGH IHP is an innovative, not-for-profit, inter-professional graduate school that provides unparalleled opportunities for students to learn and work alongside medical experts in their field. The newly expanded and renovated Institute includes physical therapy labs, a 102-seat active learning classroom with state-of-the-art technology, a work café, lounge and study areas.

Within the large classroom, students seated at any one of the 17 Steelcase media:scapes, intuitively connect their laptops and can instantly share content with their group in a single touch. Additionally, instructors can show content from any of the groups to the large projection screen at the front of the classroom, annotate over projected images from the Smart podium, or record a class session. This 21st century educational space successfully links classroom learning with research and clinical experience through active experiential learning creating a richer, more dynamic experience.

The single and divisible Physical Therapy Classrooms are outfitted with front projection and rear displays for enhanced visibility of content and are controlled with a Crestron unified touch panel and with Smart Podium annotation. Students transition from the classrooms to the Work Café, an inviting environment that encourages casual collaboration outside of the classroom.

Red Thread solutions:

- Steelcase media:scape
- Smart Podium
- Crestron Control System
- Steelcase Cobi & Move Seating
- Keilhauer Cahoots Mingle Lounge
- Neudorfer Tables
