ADVANCED INDUSTRIAL MEASUREMENT SYSTEMS

Expanding Business: Special Edition 2016 Newsletter

Big Changes!

AIMS is taking the ball and running with it even farther than before. Past newsletters have mentioned with pride that we have hired on several new employees with jobs ranging from sales to toolmakers. Now, AIMS is taking expanding to another level. Plus, we will be hosting our own big event.

More New Employees

Starting last December, Roger Watkins, now our second toolmaker, comes to us with many years of experience in various industries and will be making parts for our Revolution® HB Shop Floor CMM. Our OEM side of the business wouldn't be possible without him!

In January, we had two new hires start. Robert Miller gives AIMS another very high level programmer. With his experience in the aerospace industry, as well as his work in machine interfaces and visual basic, he is a valuable asset to the AIMS team and we're proud to have him.

Barb McCoy, our last hire so far, is our new inventory manager. She will be responsible for maintaining inventory to ensure that we have the components we need and have them on time for the construction of LM and HB CMM's to order. She will also be purchasing parts for the CMM's and will provide support for the shop and service groups to allow us to deliver our CMM's in a timely manner. AIMS is grateful to have her, since she will be the glue that keeps multiple facets of the company together and working in order.

Major Renovations and Updates

Since the beginning of January, AIMS has set in motion its plans for a major remodeling of the warehouse portion of our 20,000 square foot building.

Currently underway, construction of four new office spaces, an applications office, an inventory room, a new bathroom, and two extra office rooms are what all the noise is about.

To be closer to and better support the areas they manage, our applications manager and service manager will be given respectively two of the new offices. Our new inventory manager will also have her own

office as well as a room adjacent to it to stock with Revolution® HB and LM inventory. The new communal office for our applications engineers will be a much needed step up from their current office arrangements – they will now have a proper office to do their work in. Lastly, the new bathroom will be a necessity with all the new employees AIMS have hired on recently, plus, with this addition, our old shop bathroom will now serve as a nice handicapped bathroom.

AIMS will be hosting its first ever *Advancing Quality in Manufacturing* event at our facility! Join us May 10th – 12th, 2016 at AIMS facility in Miamisburg, Ohio to see the future of the metrology industry. With our new Revolution® HB Shop Floor and Revolution® LM Lab Grade CMM, built here at AIMS, we will be demonstrating how you can inspect parts with a quality CMM at unprecedented levels of throughput – making parts has never been faster and more accurate! Also included in the demonstration will be our new software driver. Renewal® software for old systems, gives new life to older and outdated CMM's by providing a virtual link between the CMM and Renishaw's Modus™ software, to which the old CMM will perform even more efficiently than new.

So far, the event will also feature keynote speakers and tours of AIMS' new and improved facility. Lunch will also be provided.

If you are interested, or have any questions, comments, or concerns, call AIMS facility at (937) 320-4930, or send an email to grockwell@aimsmetrology.com.
