**BigRoad**
A Fleet Complete Company

THE ULTIMATE BUNDLE
FOR SMART FLEETS, DRIVERS & TEAMS

Track vehicle location. Optimize activity in the field. Manage engine health. Automate driver coaching.
All from one platform.

Bundle includes:

✔ Fleet Tracker MGS800 with ECM on LTE network

✔ Vision by Fleet Complete

✔ BigRoad ELD

More than just dots on the map

An advanced GPS fleet tracking solution with LTE that provides visibility and insight over your assets and workforce in near real-time.

Features and benefits:

› Captures time-stamped vehicle location and improves fleet insight

› Monitors and analyzes driver behaviour in fleet performance dashboards

› Helps evaluate business inefficiencies and identify opportunity to lower fleet costs

Proactive vehicle health management

The Fleet Tracker MGS800 device connects to vehicle's Engine Control Module (ECM) and captures accurate vehicle data to help streamline timely maintenance, minimize downtime associated with breakdowns and lower service expenses.

Engine data information and alerts:

› Engine fault codes and temperature/oil/coolant status

› Brake pedal position and application pressure, parking brake switch

› True odometer, RPM, VIN and more

Automate driver coaching with video event tracking

Suited for business fleets of any size, this reliable video event recording solution includes near real-time analytics and in-cab voice assistance to improve your fleet safety and driver coaching.

Features and benefits:

› Only records once an infraction is detected

› Sounds in-cab live voice notifications of detected violations

› Provides in-app trip summary dashboard for driver

› Provides video footage of infractions in cloud-based manager app

Electronic Logging Device (ELD)

Our DashLink device is a robust and easy-to-use ELD compliance solution for engine-connected logs.

Connected Compliance

BigRoad's DashLink is the easiest and most affordable way to create compliant engine-connected logs.

› Create accurate and error-free driver logs

› Interchangable between vehicles and drivers

› Zero upfront hardware cost

Simplify the Logging Process

Driver duty status, vehicle drive time, and driver availability is automatically recorded from the engine, creating accurate logs and reports.

› Prevent HOS violations and report errors

› Create inspection ready logs

› Get paper-free digital reports

Plug and Play

Quick and effortless installation. Connect it to the vehicle and pair it with your BigRoad Mobile App via Bluetooth.

› Pass-through connections available for multiple ECM and diagnostic port types

› Easily switch between ELD equipped and non-ELD equipped vehicles

Driver behaviour reporting

In-cab live coaching:

- Lane drifting
- Speeding
- Tailgating
- Rolling STOPs
- Harsh braking
- Hard cornering

Fleet performance dashboard:

- Distance traveled
