

Fleet Complete for Ford Vehicles

Fleet Complete for Ford vehicles is a web-based fleet management solution that runs on a variety of Ford vehicles. With the immediate onboarding program and easy activation, there are no hardware costs or device installation required.

With the combined power of Fleet Complete's cutting-edge telematics technology and Ford vehicle connectivity, we provide a holistic cloud platform that connects entire businesses' fleets on one interface. It enables companies to do more with the same number of resources by automating time-consuming tasks. With Fleet Complete, fleet managers see significant improvements in fuel economy, vehicle safety, and staff productivity as well as customer service. Together, Fleet Complete gives businesses with Ford vehicles the competitive advantage they need!

Fleet Complete's comprehensive telematics platform was developed to address the widest variety of requirements, scaling to every unique business needs. We provide full visibility into critical performance data together with actionable intelligence that will help fleet managers to better their budget planning, produce better quotes, and get accurate accounting for the hours worked.

FORD COMMERCIAL
SOLUTIONS

Scalable solution

Fleet Complete's versatile platform allows customers to tailor our services to specific requirements, paying only for what they need, eliminating the risk of unnecessary expenses. Businesses can choose which product they need for optimal set-up with:

- fleet tracking
- asset management
- Driver behavior monitoring and coaching
- task distribution
- dispatch
- digital vehicle inspection
- online forms

Connectivity

High-end connectivity is vital in collecting and analyzing in-field data from GPS trackers, sensors, and mobile applications to help businesses run like a well-oiled machine. Fleet Complete leverages connectivity already in your Ford vehicle to provide visibility on fleet's performance in near-real time, remotely manage staff and asset safety, and produce customized report analysis, as detailed or top-level as you need.

Actionable intelligence

With continuous data flow from the field, users uncover opportunities to decrease operational expenses and improve business productivity. Fleet Complete has operational reports that can be run on-demand or scheduled to go out to specific team members on a regular basis.

Types of reporting included

Vehicle location and tracking: Easily view how, when and where assets are being used to maximize efficiency

Powerful safety analytics: Easily identify risky driving behavior to improve driver's safety and longevity of vehicle fleets

Distance Travelled Report: Create optimized routes and delivery schedules to save on fuel costs while increasing customer satisfaction

Idling and stop reports: Gain visibility into how often and how long vehicles are idling or stopping to coach drivers, improve fleet's efficiency and protect vehicle's health

POI Report: Know when an asset arrives and departs from key locations

Trip Report: Make smarter business decisions with insights into trip lengths, fuel levels of each trip and more

Competitive advantages for Ford

- No long-term contract
- Know where vehicles are at all times
- Identify the closest available worker to take on the assignment
- Optimize multi-leg routes and save on travel time
- Assign workload using live mapping and know when the job is complete
- Collect in-field data
- Safeguard assets from theft, loss and misuse
- Increase vehicles lifetime with maintenance and health status reports
- Get sophisticated performance reports, KPIs, and driving behaviour analysis
- Manage fuel efficiency and timely vehicle maintenance
