

GENERAL MOTORS FLEET

# Fleet Complete for GM

Fleet Complete for GM is a web-based fleet management solution that runs on a variety of OnStar-equipped GM vehicles (Chevrolet, Buick, GMC and Cadillac). With the immediate onboarding program and easy activation, there are no hardware costs or device installation required.

With the combined power of Fleet Complete's cutting-edge telematics technology and GM's OnStar connectivity, you gain a holistic cloud platform that connects you to your entire business fleet on one interface. It will help you automate time-consuming tasks and enable you to do more with the same number of resources. You will see significant improvements in fuel economy, vehicle safety, and staff productivity as well as your customer service and financial savings. Give your business the competitive advantage it needs!

Fleet Complete's comprehensive telematics platform was developed to address the widest variety of requirements, scaling to your unique business needs. Gain full visibility into critical performance data together with actionable intelligence that will help you better manage your budgets, provide better quotes, and get accurate accounting for the hours worked.

## Scalable solution

Start simple and easily scale as your requirements change, or when your business expands. Fleet Complete's versatile product portfolio allows the platform to be customized to your specific needs at the moment without the stress of having too much. Once your business is ready, you can have the optimal set-up with

- › fleet tracking
- › asset management
- › cargo monitoring
- › electronic logbooks
- › task distribution
- › dispatch
- › digital vehicle inspection
- › online forms

## OnStar Connectivity

High-end connectivity is vital in collecting and analyzing your in-field data from GPS trackers, sensors, and mobile applications, making your business run like a well-oiled machine. With GM's 4G LTE WiFi hotspot and OnStar connectivity, you can view your fleet's performance in near-real time, remotely manage staff and asset safety, and get customized report analysis, as detailed or top-level as you need. Start making smarter business decisions today!

## Actionable intelligence

With continuous data flow from the field, you uncover opportunities to decrease operational expenses and improve business productivity. Fleet Complete has 7 customized operational reports that can be run on-demand or scheduled to go out to specific team members on a regular basis.

## Types of reporting included

**Activity Report:** Easily view how, when and where your assets are being used to maximize efficiency

**Distance Travelled Report:** Create optimized routes and delivery schedules to save on fuel costs while increasing customer satisfaction

**Idling Report:** Gain visibility into how often and how long vehicles are idling to coach drivers and protect your vehicle's health

**POI Report:** Know when an asset arrives and departs from key locations

**Stop Report:** Identify opportunities for greater efficiency by analyzing the frequency of stops being made by your assets

**Trip Report:** Make smarter business decisions with insights into trip lengths, fuel levels of each trip and more

## Competitive advantages for one solution

- › No long-term contract
- › OnStar Connectivity
- › 4G LTE WiFi
- › Know where your vehicles are at all times
- › See the closest available worker to take on the assignment
- › Optimize multi-leg routes and save on travel time
- › Assign workload using live mapping and know when the job is complete
- › Collect in-field data
- › Safeguard your assets from theft, loss and misuse
- › Ensure the safety of your lone workers, especially in remote locations
- › Get sophisticated performance reports, KPIs, and driving behaviour analysis
- › Manage fuel efficiency and timely vehicle maintenance
