Rolec WallPod Overview

THE ULTIMATE INTERCHANGEABLE POD SYSTEM

WallPod Industrial Use

Rolec WallPod is a division of Rolec Services Limited, manufacturing and supplying a revolutionary (patent pending) product specifically designed to offer a range of interchangeable utility service pods for both home and commercial use.

This amazing product is made up of a wall or post mounted base unit which has the capability to accept 2 of any 22 interchangeable pods, with more pods currently in the design stage.

Once the base unit has been installed you simply choose two service pods to suit your individual requirements. If and when your requirements change, you can quite easily replace your pods with new ones to satisfy your needs, whilst retaining your existing base unit – it's that simple!

The versatile nature of this product enables it to cater for a wide variety of services including electricity, water and compressed air, and it can even provide electric vehicle home charging solutions.

Both WallPod base units and service pods are available in a range of colours which can be mixed and matched to suit your individual colour scheme or company corporate colours.

Interchangeable Pods currently available include:

- 13amp domestic socket • 16amp industrial socket • 32amp industrial socket
- Socket protective switchgear • kWh meters • Water taps • Compressed air
- TV points • Telephone points • Data sockets • Electric vehicle charging pods

More Pods due to be released shortly

WallPod EV Charging

WallPod at Work

Car charging

Garden: Water

Lighting

Home maintenance

Car washing

Garden: Electric

Entertaining
