

Cathy-Ann Widdows
HR & Payroll Manager

“The App has enabled employees to do the survey in their own time without disrupting their work – no complicated log-ons, quick and easy to use.”

Industry	Employees	Location	Use case
Logistics	3000+	Leicester	Streamline Survey Process

The outcome

The App's survey drastically reduced the amount of time spent getting employees opinions.

Staff were able to fill out the survey in their own time.

Smart phones quicken the survey process.

“Most of the warehouse associates use a smartphone and are more open to completing things this way”

The Challenge

Neovia send out an annual employee survey known as 'The Voice'. Getting all employees to complete the survey proved a challenge as not all employees have access to email. In order to complete the survey previously, computers were set up in a dedicated office and employees were attended in groups, taking up valuable working time and resources.

The Result

Neovia now utilise their employee app to share the survey by using the "Survey Monkey" plugin.

Employees can now access and complete the survey in their own time, and on their own device which has completely streamlined the whole process. It now takes a couple of minutes for an employee to take part and has no impact on the working day.
