FinTech Tech Lead/Solutions Architect

Location: JHB
Business Unit: Telecoms

Description

Should be maintaining high-quality software development and documentation standards. He or she should be a technical expert in the areas of software architecture and design across AdaptIT's FinTech-related products to be able to provide guidance to the Development and Support Teams that will be involved in the delivery of the project.

He or she should work closely with the Squad Lead and the Project Manager to ensure that AdaptIT systems and software are reliable, maintainable, performant, of high quality, and meeting the customer's requirements in terms of functionality and delivery timelines.

Responsibilities:

- Review and approve internal documentation.
- Review and approve major design changes proposed by the Developers.
- Be in contact with each Developer as well as the Project Managers on the Technical Lead's projects several times per week to monitor progress and identify any blocking points where assistance is required.
- Evaluate possible future candidates for inclusion in the Development Team.
- Perform Technical Assessments of new solutions.
- Assist in responding to RFIs, RFQs, and RFPs.
- Drive technical design sessions for new projects.
- Design new solutions, write, and maintain the Functional Specification.
- Attend customer meetings to support the Project Manager from a technical point of view.
- Facilitate and contribute to design and development standards, principles and processes.
- Understand the project requirements fully.
- Guide and assist the client's technical team with technical issues/requirements specific to the project.
- Provide technical and specialist support to the development team assigned to the project
- Coordinate and manage configuration, deployment of code and assist with UAT troubleshooting.
- Assist to perform quality assurance on code written by the team members.
- Assist with development on other projects.
