

## Adapt IT Vacancy

### Onsite Fusion Developer

**Location:** JHB  
**Business Unit:** Telecoms

#### Role Description:

Engineering Fusion is part of the platforms that require an immense amount of changes in order to facilitate the migration to the new billing platforms.

#### Requirements of Role:

The onsite Development resource will be responsible for the following duties:

- Generate technical designs and interface documents
- Analyse, design, develop and implement complex Fusion Middleware (FMW)
- REST and SOAP services in BPEL 12C and OSB 12C
- Perform design review and code review for FMW services for peers and provide feedback to come up with robust architecture.
- Working with other teams, vendors and consultants ensure project goals and milestones are achieved.
- Effectively present technical concepts and issues to both technical and functional team members.
- Configure WebLogic Server administration, specifically regarding configuring data sources and queues for use with SOA \OSB, server start/stop & configuration changes (GC, startup parameter...etc)
- Oracle SOA Suite 11g and 12c Admin.
- Optional Extras
- Provide day to day production support and off hours support as required.  
Standby

Adapt IT is committed to successfully implementing employment equity initiatives that actively promote our Broad-Based Black Economic Empowerment (B-BBEE) policy.
