

my Social Security

How to Create an Online Account

You can create a *my* Social Security account to access your *Social Security Statement* to check your earnings and get your benefit estimates.

If you receive benefits, you can also:

- Get your benefit verification letter;
- Change your address and phone number;
- Start or change your direct deposit;
- Request a replacement Medicare card; and
- Get a replacement SSA-1099 or SSA-1042S for tax season.

Even if you do not currently receive benefits, you can:

- Check the status of your application or appeal.
- Get a benefit verification letter stating that you:
 - never received Social Security benefits, Supplemental Security Income (SSI) or Medicare; or
 - received benefits in the past, but do not currently receive them (The letter will include the date your benefits stopped and how much you received that year.); or
 - applied for benefits but haven't received an answer yet.

You may be able to use your free *my* Social Security account at www.socialsecurity.gov/myaccount to request a replacement Social Security card online, as long as you live in one of the participating states or the District of Columbia, are not requesting a name change or any other change to your card, and you meet other requirements.

There is no fee to create a *my* Social Security account, but you must have an email address. See other side for instructions on setting up an account using an activation code.

Email account set up

There are many options available to set up an email address and it can be done in as little as five minutes. Each email provider has its own criteria for setting up an account and you must accept the provider's terms of use agreement. Some examples of free email providers include:

AOL: aolmail.com

Gmail: gmail.com

iCloud Mail (Apple): icloud.com

Outlook: outlook.com

Yahoo: yahoo.com

**This is not a complete list of email providers. Social Security is not endorsing any of these particular email account provider(s), as you may use other email account providers as appropriate.*

NOTE: *Even if you do not use email on the computer, if you have a smart phone it is likely that you already have an email account. Contact your cell phone service provider to find out.*

Setting up your own *my* Social Security account

After you have a valid email address, you are ready to set up your own *my* Social Security account. To set up your account, visit www.socialsecurity.gov/myaccount then follow the steps on the back of this page:

Select “Sign In or Create an Account”

To create a *my* Social Security account, you must be at least 18 years old and have:

- A valid email address;
- A Social Security number; and
- A U.S. mailing address.

The screenshot shows the 'Create an Account' page. A blue banner at the top says 'Set yourself free. Open a my Social Security account today and rest easy knowing that you're in control of your future.' Below the banner, there are links for 'Learn More' and 'Important Information'. At the bottom, the 'Create An Account' button is circled in red.

Using your activation code to create your account

You may have been given a letter with an activation code to complete the creation of your *my* Social Security account.

- Select “Finish Setting Up Your Account” and enter the information requested, including the account activation code we gave you.

The screenshot shows the 'Finish Setting Up Your Account' page. A blue banner at the top says 'HAVE AN ACTIVATION CODE? Finish Setting Up Your Account'. Below the banner, there is a message: 'Received assistance from Social Security to create your account? Finish the process by entering your activation code now.' At the bottom, there is a text input field for 'Account Activation Code' which is circled in red, and 'Next' and 'Exit' buttons.

Provide some personal information to verify your identity

The screenshot shows the 'Social Security' website with the heading 'Please tell us who you are'. The form includes fields for 'Your Name' (First, M.I., Last, Suffix), 'Social Security Number (SSN)', and 'Date of Birth' (Month, Day, Year).

Choose a username and password

- Then, select how you would like to receive a one-time security code by providing the email address you registered or text-enabled cell phone number. You'll then receive a security code via text or email that you will need to enter within 10 minutes to finish creating your account.

The screenshot shows the 'Get your security code' page. It asks 'How do you want to receive your security code?' with options for 'Text Message' (selected) and 'Email'. There is also a 'Call Phone Number' field.

Two screenshots showing the security code entry process. The left screenshot shows a message: 'We sent a text message to (202) 994-3339. Please enter your security code. Please enter your security code.' The right screenshot shows a message: 'We sent an email to us123@email.com. Please enter your security code. Please enter your security code.' Both screenshots have the 'Enter the security code you just received' field circled in red.

NOTE: We'll send a one-time security code to your cell phone or to your email address each time you sign in with your username and password. The security code is part of our enhanced security feature to protect your personal information. Keep in mind that your cell phone provider's text message and data rates may apply.
