

# Data Protection Officer (TÜV) Including the EU General Data Protection Regulation (GDPR)

GDPR requirements apply to each member state of the European Union, aiming to create more consistent protection of consumer and personal data across EU nations.

# Data Protection Officer (TÜV) Including the EU General Data Protection Regulation (GDPR)

GDPR has increased penalties for non-compliance. Supervising Authorities (SAs) hold investigative and corrective powers and may issue warnings for non-compliance, perform audits to ensure compliance, require companies to make specified improvements by prescribed deadlines, order data to be erased, and block companies from transferring data to other countries. Data controllers and processors are subject to the SAs' powers and penalties.

Data Protection Officers (TÜV) have a proven knowledge in respect of Article 37, paragraph 5 of the EU General Data Protection Regulation. They know the legal requirements in the area of data protection (e.g. EU GDPR, Act to Adapt Data Protection Law to EU Regulation), the rights and responsibilities of data protection representatives and the components of an efficient data protection management system. They are in a position to implement and supervise such a system's basic features.
