

FDAiVerify.com: Complete Confidence in FSVP and Supplier Verification Compliance

Using [FDAiVerify.com](https://fdaivverify.com) (powered by 3iVerify) makes complete sense because it makes the entire FSVP development, documentation and inspection process **faster** and your FSVP more **reliable**, more **accessible** and more **secure**.

Automated cloud-based supplier / ingredient and product verification	➡	Taking the fear out of FDA's FSVP food importer inspections
"Green-means-Go" decision-making ensures you have all you need to approve a purchase	➡	So your importation process does not hinder your customer fulfilment obligations
Powerful supplier interview questionnaires as narrow or broad as they need to be	➡	Enabling integration of Supplier Verification with your Customs and Corporate Governance Compliance
Customizable Hazard Analysis and Preventive Control Templates	➡	For foreign or domestic supplier (and customer!) verifications
Seamless document control and approval process	➡	Reducing human error
Dynamic updating and corrective action programs to correct, verify and document real time changes	➡	So you know it's always right and gets fixed -- the first time

FDA's FSVP regulations go into near **full effect for the majority of U.S. food importers on March 19, 2018**. On that date, your imported food shipments from foreign suppliers having *less than 500 Full Time Equivalent employees (FTEs)* become subject to the FSVP requirements – as will your FSVP operations and documentation as the food importer. **FDA has committed to well over 1,000 FSVP inspections this year**, so the likelihood that one will be at your office has increased significantly. We recommend you call the experts at [FDAiVerify.com](https://fdaivverify.com)!

Legal and Regulatory FDA and Customs expertise – in the Cloud!

The alliance between [FDAImports.com](https://fdaimports.com) and 3iVerify combines the FDA, USDA and Customs legal and regulatory expertise of nearly 100 years with the online power of cloud-based 3iVerify to make FDA compliance easier, faster, less expensive and more beneficial to our clients and your customers.

FDAImports.com can

- Provide Preventive Control Qualified Individuals training (and certification) in the food importer (FSVP) and food processor (Preventive Control) settings
- Support your in-house food safety and regulatory affairs team by automating current documentation, certification and verification processes
- Integrate your food and food ingredient safety programs with your Customs compliance SOPs and develop cloud-based documentation for both
- Act as your PCQI to create your compliant FSVP program – or help you design supplier verifications and other steps to meet the Preventive Controls rule.
- Make sure your staff knows how to use the intuitive cloud-based FDAiVerify.com platform
- Ensure you meet **all** applicable legal and regulatory compliance requirements related to food, beverage, functional food, dietary supplement, and food and dietary ingredient importing, manufacturing, marketing and distributing, from simple and inexpensive FDA food facility registrations to labeling requirements to FTC compliance to managing FDA, FTC or Customs enforcement actions – and everything in between.

3iVerify enables food manufacturers, distributors and importers to verify and easily document compliance of their suppliers and purchasers while maintaining strict controls on the confidentiality of the product, ingredient, supplier and safety data. **3iVerify** is a cloud-based program which integrates data from multiple sources to ensure a fully compliant food safety management system.
