- Allows for spontaneity
- Facilitates family unity
- Generates disability awareness and inclusion
- Combines technologies for a better quality of life

Proceeds Benefit:

### Why is it important to have the EasyGo™:

Imagine a family-planned six-hour excursion to the state fair. What fun such a trip should be for any child! But what if the child were told that she would not be allowed to use restroom facilities until she returned home? Would she want to take that trip? Probably not. And that is why an entire population of our citizens is stuck at home - because suitable restroom facilities that meet their needs do not exist in our communities.

Among the 240,000 Maryland families caring for children and young adults with special needs, many of them need assistance using the restroom. Many are in wheelchairs and require adult-size changing tables. All families want to participate in their communities. The perpetual isolation for this population can have negative impacts on their physical and mental health. Children and families deserve the opportunity to fully engage the riches of their communities and the EasyGo™ can help make that happen.
