

CUSTOMISE YOUR TEAMS AND SKYPE FOR BUSINESS INVITES

Simplify the meeting experience with **CustomInvite**

A SINGLE MEETING INVITE FOR A UNIFIED EXPERIENCE

Modality Systems CustomInvite is designed to simplify the joining experience for online meetings. It provides a single meeting invite that can be integrated with different audio and video conferencing services. With Microsoft technology at its heart, CustomInvite facilitates a more efficient, productive and user-friendly outcome.

Non-essential details can be removed, creating a clearer conference invite, and joining codes and numbers can be made more prominent to enable one-click access for mobile users.

Personalisation can be extended to include language options and corporate branding on a global or regional basis. To streamline the transition from existing solutions, Microsoft Teams and Skype for Business branding can be removed to maintain consistency with legacy applications and create a consistent user experience for mixed user bases.

With integration of third party audio, video and web conferencing systems, your colleagues, partners and customers can become part of the conversation – without the need for additional plug-ins or application downloads.

BUSINESS VALUE

INTEGRATION

Of third party audio and video conferencing applications and meeting room systems.

ADOPTION

Of a new solution that's familiar to users, simple to customise and easy to join from the office or on the move.

TRANSITION

From multiple legacy apps and phone systems to a single, sophisticated solution.

BRANDING

Of the invite 'look and feel' to mirror company branding and messaging.

CustomInvite extends the standard capabilities of Teams and Skype for Business invites – adding new levels of customisation and a seamless user experience to encourage adoption and drive down costs.

INVITING COLLABORATION

CustomInvite is ideal for organisations with dispersed workforces and diverse communication needs, looking to encourage a more collaborative working environment - both internally and with external partners.
