BRING VIDEO CONFERENCING INTO YOUR MICROSOFT STRATEGY

Enjoy a single, consistent user experience driven by your Microsoft investment with **OneMeeting.**

JOIN, SHARE AND COLLABORATE FROM ANYWHERE

OneMeeting from Modality Systems is a video interop platform that allows users to join Microsoft Teams or Skype for Business meetings from any video conferencing system. It creates a bridge between any device and the Microsoft cloud, making it easier for your customers and partners to work with you in a Microsoft world.

No more integration issues, scheduling problems and awkward interfaces. Now everyone can join, share and get things done, on any device, anywhere.

The hosted OneMeeting service is designed for organisations seeking to create a single, consistent user experience driven by Microsoft technology. It is simple to deploy with meetings scheduled through Outlook in the usual manner.

There is no learning curve for organisers or participants. Everyone can join Microsoft Teams or Skype for Business meetings with ease.

Compatible with any SIP or H323 in-room video conference system, OneMeeting optimises existing investments, extends the value of Office 365 licences and reduces video conferencing support enquiries.

Integrated, easy to manage and all based around Microsoft technology, OneMeeting makes anywhere collaboration a natural part of the working day.

BUSINESS VALUE

OPTIMISE
Bring in-room video systems into everyday use to extend the value of Microsoft 365 licence investments.

SIMPLIFY
Eliminate disjointed user experiences and make in-room video conference facilities quicker and easier to use.
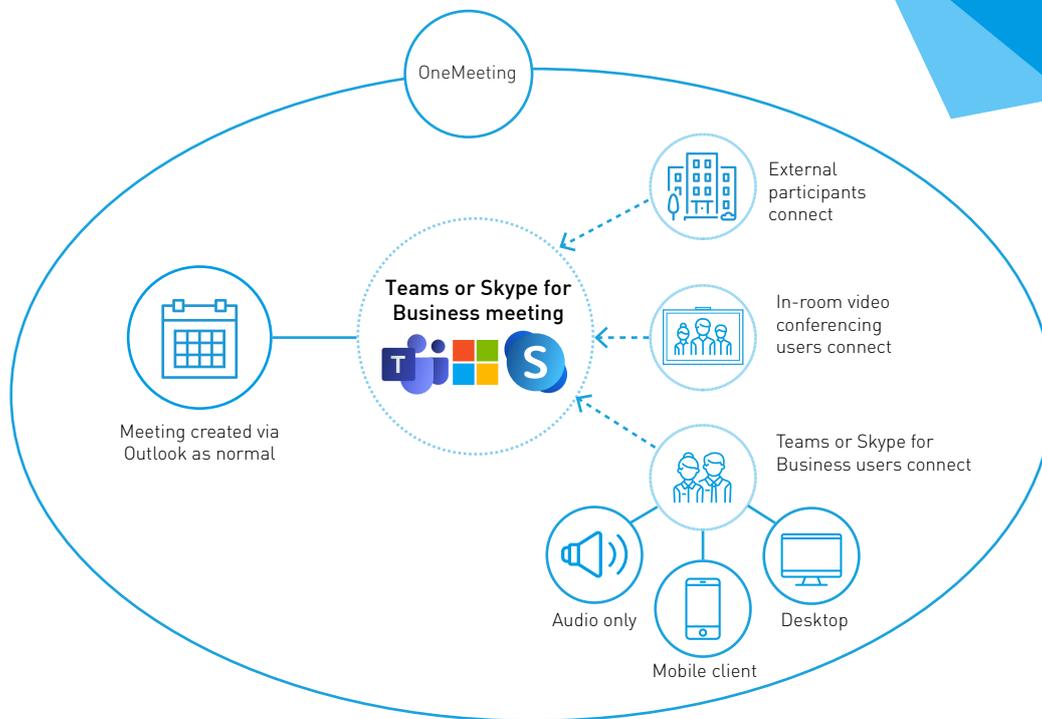

STREAMLINE
Save time and resources by reducing calls into IT support and help desks.

INTEGRATE
Extend the Microsoft communications experience across all devices to build an integrated future and reduce shadow IT.

SEAMLESS COLLABORATION

OneMeeting is designed to support today's flexible and increasingly digital workstyles – simplifying communications and extending collaboration across all your devices.

Meeting created via Outlook as normal

OneMeeting

HOW IT WORKS

OneMeeting brings together a hosted bridging platform for in-room video conferencing endpoints, and the OneMeeting Outlook plugin. This creates an invite with standard joining details (i.e. client, audio, browser) and a code for in-room conference users.

The meeting is scheduled in Outlook, and participants join in the usual way. If they choose to connect via an in-room video conferencing system, users simply dial the unique access code.

The code is validated by the OneMeeting proxy server and users are connected into the correct Teams or Skype for Business meeting via the hosted bridging service. There's no need to pre-book conferencing rooms, and it all happens in seconds. It's quick, simple and easy to use!

KEY BENEFITS

CONVENIENCE
No need to pre-book conferencing room facilities.

USER EXPERIENCE
Familiar interface and single, consistent user experience.

SPEED & CONVENIENCE
Users don't need to learn different technologies or pre-book facilities.

AGILITY
Join from any device including in-room conferencing systems.

HOSTED
Simplifies the hardware estate, adds scalability and reduces demand on IT support.

OPTIMISED
Maximises video conferencing system and Microsoft investments.
