mojo Networks

How smart is your wireless network?

Does it figure out what's going on so you don't have to?

Lets face it. You spend a lot of time chasing down network issues. Every time its the same thing... One of your users has a connectivity issue and immediately the WiFi is to blame. The alarms sound, your team scrambles for hours to recreate the issue navigating a bevy of disparate, complex management consoles and troubleshooting tools to capture traces and packet captures that you hope will identify the root cause du jour.

Why not choose a network with the built-in capabilities of a Level-3 support engineer, an RF specialist, and a security agent in every access point?

Mojo's Cognitive WiFi™ solution combines an intelligent, secure cloud-based management platform with power of the C-130 Wave 2 802.11ac 4x4:4 tri-radio access point to deliver deep visibility, analytics and secure high performance connectivity that save you hours of time troubleshooting and optimizing your network for peak performance. The C-130's third radio works around the clock, scanning the airwaves for rogues, collecting data used to identify anomalies to baseline network performance, and identifying the root cause of connectivity issues in real time. It can even turn itself into a client and proactively test connectivity of neighboring access points on-demand or on a scheduled basis.

Customers who have chosen Mojo have boasted saving as much as **10 hours per week** on troubleshooting as well as a **dramatic reduction in onsite service calls**.

Just think about it:

- No more hours spent recreating issues at multiple locations.
- Immediate resolution to connectivity and performance issues.
- Deep visibility into application performance and user behavior.
- Iron-clad wireless security protection rated by Gartner as #1 in the industry for six consecutive years.

The best part: Mojo's all-inclusive single-part number pricing model includes the AP and the management license with all features, support and No-RMA limited lifetime hardware warranty for one low price.

Are you ready for smarter WiFi? Contact your Mojo Networks sales representative or authorized partner to take advantage of this offer today! Or you can always reach out to us at sales@mojonetworks.com.
