

Rittal Has More To Offer.

Automated products can increase the efficiency of your modification operations.

With the purchase of the Perforex BC Machine, your business will take a giant leap forward in automating your modification operations.

As your company evolves with machining automation, Rittal is there to deliver a full suite of products to enhance process efficiency. Find out more below.

Assembly Frames

Rittal Assembly Frames are mobile, tiltable and (depending on the version) height-adjustable assembly frames for use during the automation and rationalization of processes throughout every stage of machining, assembly, wiring and testing of enclosures.

Cable Duct and DIN rail cutting

No lengthy times spent on measuring and cutting, and no complicated handling. Secarex cutting center is convenient to use and cuts wiring ducts, cable duct covers and support rails to length quickly, precisely and reliably.

Semi-automatic wire processing

Rittal wire processing machines automatically cut, strip and install ferrules. In addition, a variety of cross-section wire sizes can be used with complete control over length, strip length and size of ferrules.

Hand Tools

Rittal high-quality hand tools are designed specifically for the modification and assembly tasks. Their rugged construction and ergonomic design ensure they will be a valuable part of your toolbox for years to come..

To ensure your machine runs at peak performance, a comprehensive maintenance program is available. For your nearest distributor, call 800-399-0748, email marketing@rittal.ca or visit rittal.ca.
