10 years of digital pioneer work

Delivery from Idea to Cable

- **Strategic advice for digital transformation**
- **Modern architecture and implementation projects**
- **Bimodal Managed Services**
- **In dedicated and public cloud environments**
- **Including AWS, Azure and Google Cloud**

*um is a leading Full Service Provider for ambitious digital projects. Our team consists of the brightest minds in both Big Data and Cloud Services. We take care of your whole Data Lifecycle: from Data-driven Consulting Services over Solution Development to secure Cross-Cloud Data Operations.

We understand all aspects of a data project. That's how we guide our clients from the idea through to the finished data product.

Emerging technologies enable market leadership. This is true for large organizations as well as business-leaders in niche markets. But how do you apply these technologies, before everybody else does? Better talk to the pioneers, let *um take care of that!
