GROUP SWIM LESSONS

CHOOSING THE RIGHT CLASS FOR YOUR CHILD

The ATC Group Swim Lessons Curriculum consists of courses containing age-appropriate activities that focus on the development of core swimming competencies and, once achieved, development of proper stroke technique. It is important that students enroll in a course that is age and developmentally appropriate. Utilizing the flow-chart below, you can assess your child's unique skill level and developmental progression to determine what class would be best for their swim progression.

GROUP SWIM LESSONS CURRICULUM

The ATC Group Swim Lessons Curriculum consists of courses containing age-appropriate activities that focus on the development of core swimming competencies and, once achieved, development of proper stroke technique. It is important that students enroll in a course that is age appropriate. Regardless of age, each student will work at his or her individual level of swimming development within a lesson. All children will be individually assessed as to what level and what class would be best for their swim progression.

WATER BABIES COURSE CURRICULUM AGES 6-18 MONTHS

Parent/Caregiver & Child | two 30 minute lessons (Monday/Wednesday)

This is a pre-swimming class with parent participation. The purpose of the Water Babies Course is to familiarize young children to the water, while at the same time training parents in water safety and drowning prevention. This course will provide a fun, confidence-building water experience by incorporating the skills of blowing bubbles, explore submerging mouth, nose, and eyes under water, explore buoyancy on the front and back position, and change body position in water with assistance. The purpose of this course is to familiarize young children to the water and introduce them to the basic structure of a swimming lesson. It is not designed to teach children to become good swimmers or to survive in the water on their own. A maximum ratio of (1) instructor to (5) children is permitted. Class will be held in the ATC Training Pool.

PARENT & CHILD COURSE CURRICULUM AGES 18-48 MONTHS

Parent/Caregiver & Child | two 30 minute lessons (Tuesday/Thursday)

The Parent & Child is a pre-swimming class with parent participation. This course provides a fun atmosphere while building confidence in the water. We will introduce the fundamentals of blowing bubbles, underwater exercises, and buoyancy. Some basic swim elements such as front and back glide with support are incorporated. In addition, parents and children will learn basic water safety rules, how to avoid water hazards by asking permission, and how to call for help. This course will be considered one level above the Water Babies Course and is not designed to teach children to become good swimmers or to survive in the water on their own. It is designed to prepare them to learn to swim in the ATC Level 1 class. Class will be held in the ATC Training Pool.

LEARN TO SWIM: LEVEL 1-2 CURRICULUM AGES 4 YEAR & OLDER

Four 30 minute lessons (Monday–Thursday)

LEVEL 1

The Level 1 course is designed to meet the needs of four year olds and up through elementary age. This course will develop a higher comfort level in the water, safe practices in and around water, and good swim habits. For those children who are developmentally ready, it will teach beginning swim skills. Students work toward accomplishing the seven core competencies as listed below and receive recognition that shows the child has obtained a solid understanding of the skill and can achieve it with or without assistance.

- Blowing bubbles and bobbing
- Retrieve submerged objects
- Roll from back to front
- Front and back glides and floats
- Tread water using arm and hand actions
- Swim the length of the training pool with fins or with the use of front flotation device
- Swim the width of the training pool using combined arm and leg actions

Safety Skill: Always ask permission before getting in the water.

At this level the parent and child may elect to repeat this course until these skills are accomplished or advance to Level 2.

LEVEL 2

The Level 2 course is designed to give participants success with fundamental skills by working towards and accomplishing the nine core competencies as listed below. The child receives recognition that demonstrates that they have obtained a solid understanding of the skill and can achieve it assisted or unassisted dependent on the activity. The Level 2 course is designed for preschoolers on up through elementary age. A maximum ratio of (1) instructor to (5) students is permitted.

- Successful demonstration of Level 1 core competencies
- Fully submerged and holding breath
- Opening eyes underwater and retrieving submerged objects
- Unassisted front and back glides and floats
- Roll from front to back and back to front
- Tread water using arm and leg action
- Combined arm and leg actions on front and back
- Assisted roll from streamline to starfish
- Swim the length of the training pool using combined arm and leg actions

Safety Skill: Learn how to recognize an emergency and how to call for help.

At this level the parent and child may elect to repeat this course until these skills are accomplished or advance to Private Swim Lessons.

WHY SHOULD I ENROLL MY CHILD IN SWIM LESSONS?

Swimming is a valuable skill for both children and adults, but is best learned as a child for a variety of reasons. Swimming is an activity that can be done throughout the year in pools, lakes, and oceans. Different activities can be done in these areas such as boating, diving, swimming and playing in the water. Children should learn to swim for health and safety reasons as well as to enhance personal enjoyment.

SAFETY

Knowing how to swim is essential for water safety. Children should be taught to swim in a safe environment, and they should learn not only swimming strokes but basic water safety techniques, such as how to float and tread water for extended periods of time. However, children should always be supervised in the water regardless of their swimming ability.

FITNESS

Swimming is important for fitness and is one activity that can be done throughout the lifespan. Since swimming is done in the water there is minimal impact on the joints. United States Masters Swimming cites that swimming can aid in the development of both strength and cardiovascular health. Children need this and it teaches them good habits that they can use for the rest of their lives.

PHYSICAL DEVELOPMENT

Swimming can aid physical development in children. Swimming requires coordination of both the arms and the legs, something that many other sports and activities don't offer. Strokes like breaststroke and butterfly involve the arms and legs doing very different motions at the same time. This helps the development of coordination and gross motor skills. In addition, this will help children develop higher level thinking skills as they are forced to think about their movements.

SOCIAL OPPORTUNITIES

Enrolling a child in swimming lessons provides them with social opportunities. Most swim lessons are taught in a group and children will learn how to be patient and take their turn. In swim lessons, children learn that rough playing in the water can hurt others and they learn to take responsibility for others while they are swimming. In addition, many children go from swimming lessons to swim team and develop lasting friendships with the people they meet.
