Enfucell has received ISO 9001 certification

Enfucell Oy is proud to announce that it has received ISO 9001:2015 certification. Our quality management system has been registered by DQS, one of the leading certification bodies for management systems worldwide with 80 offices in 60 countries, and 2500 auditors and experts. The scope of the certificate includes design, manufacturing and sales of thin and flexible batteries, Internet of Things devices and battery materials.

The management system ensures that Enfucell is prepared to operate in demanding quality environments. The company is committed to serve its customers, including large companies, by supplying products and services which are safe, reliable and of good quality. Continuous reviewing and improvement remain essential parts of the daily processes and act as a means to meet our customers' needs and expectations.

Enfucell is a technology company located in Vantaa, Finland. Enfucell has developed a printable, thin, flexible, and eco-friendly SoftBattery® power source, which can be used in various Internet of Things and wearable electronics products and applications. The company was started in 2002, and employs about 10 people. For more information, please visit www.enfucell.com.
