

1. Transport Canada Publication No. TP 14155E		2. Project No.		3. Recipient's Catalogue No.	
4. Title and Subtitle Aircraft Ground Icing Research Support Activities for the 2002-03 Winter				5. Publication Date	
				6. Performing Organization Document No. CM1747	
7. Author(s) Nicoara Moc				8. Transport Canada File No.	
9. Performing Organization Name and Address APS Aviation Inc. 1100 Rene-Levesque Blvd. West, Suite 1340 Montreal, Quebec H3B 4N4 Canada				10. PWGSC File No.	
				11. PWGSC or Transport Canada Contract No.	
12. Sponsoring Agency Name and Address Transportation Development Centre (TDC) 800 René Lévesque Blvd. West, Suite 600 Montreal, Quebec H3B 1X9 Canada				13. Type of Publication and Period Covered Draft	
				14. Project Officer Barry Myers	
15. Supplementary Notes (Funding programs, titles of related publications, etc.) <p>Several research reports for testing of de/anti-icing technologies were produced on behalf of Transport Canada for previous winters. These are available from the Transportation Development Centre (TDC). Thirteen reports (including this one) were produced as part of this winter's research program. Their subject matter is outlined in the preface. This project was co-sponsored by the Federal Aviation Administration.</p>					
16. Abstract <p>This report contains the results of work conducted by APS Aviation Inc. (APS) on support activities related to aircraft deicing research. Three subprojects are included in this report.</p> <p>Support the Development of an Aerospace Standard for Testing Type I Fluids The proposed Aerospace Standard AS 5485 is being developed for endurance time testing of aircraft deicing/anti-icing fluids certified under AMS 1428 (Types II, III and IV fluids). APS developed a new proposed standard for Type I fluids, based mostly on the proposed Aerospace Standard AS 5485. This standard was disseminated to the SAE G-12 HOT Subcommittee Workgroup for review.</p> <p>Design a Web Page to Publish the Holdover Time (HOT) Guidelines In order to standardize the Holdover Time (HOT) information published on web sites and to eliminate the safety risks associated with discrepancies, APS developed and implemented a web site for the official Transport Canada HOT Guideline Tables. This single source of HOT information is published in English and French, primarily for Canadian operators.</p> <p>Support the Acquisition of an RJ Wing Over the past two winters, APS has provided support to Transport Canada in their efforts to acquire a modern wing, an RJ Series 200, from Bombardier. A draft loan agreement for the wing was made between Transport Canada and Bombardier but due to a lack of funding the activity is currently on hold.</p> <p>This report also contains an account of the test procedures and presentations that were produced for the program activities conducted in 2002-03.</p>					
17. Key Words RJ Wing, Aerospace Standard, Type I Fluid, Web Site, Procedures, Presentations, Fluid Manufacturer Reports, HOT Guidelines			18. Distribution Statement Limited number of copies available from the Transportation Development Centre		
19. Security Classification (of this publication) Unclassified		20. Security Classification (of this page) Unclassified		21. Declassification (date) —	22. No. of Pages xiv, 18 app.
