

PROOF OF DELIVERY SIMPLIFIED

IN MOST CASES,
HERE'S HOW IT WORKS:

- 1 Order is picked, delivery note printed
- 2 Truck is loaded
- 3 Driver takes delivery note with product to customer
- 4 **THE DRIVER MANUALLY CAPTURES:**
 - Signature for delivery
 - Changes in quantities
 - Records date, time and location
 - Adds Notes
- 5 Delivery notes are brought back after all deliveries are finished
- 6 Delivery notes are manually filed and posted into the Accounting Systems.
- 7 Invoices are printed and manually matched with the POD. Invoice/POD set mailed.

HERE'S HOW IT WORKS WITH OUR
SOLUTIONS IN PLACE:

- 1 The company prints the delivery notes as usual and digitally sends to the driver's mobile device
- 2 Truck is loaded
- 3 **THE DRIVER DIGITALLY CAPTURES:**
 - Signatures
 - Changes in quantities
 - Time/Date
 - Location
 - Pictures
 - Notes
- 4 The delivery notes are sent back to the office in real-time after each delivery and a set of processes can be kicked off automatically:
 - Send the POD to an EDM system
 - Post the transaction to Accounting
 - Invoicing the POD matched automatically and emailed to the customer
