

## One stop search engine for Oncology models including PDX, cell line derived xenografts, and syngeneic models

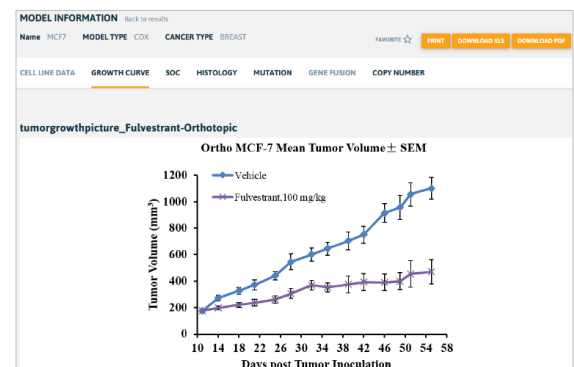

Utilize CrownBio's powerful new online search engine to instantly access our global suite of Oncology models.

OncoExpress enables you to rapidly review, compare, and select oncology models to meet your research needs, through an easy to use online interface accessing well curated and annotated model information.

Search Genotypic, Biomarker, and Pharmacology Data Across a Range of Oncology Models

Subtype	Grade	Stage	Biopsy site	Treatment history
ADC	II	T3N0M0	Colon	NA

- Browse our diverse portfolio of Oncology platforms, including:
  - 1,700 models from our ever increasing **HuPrime®** collection of 2,500 well-characterized patient-derived xenografts (PDX)
  - Over 1,300 cell lines and 230 cell line derived xenograft models
  - Immuno-oncology models including our growing collection of syngeneic models, **HuGEMM™**, and **MuPrime™**.
- Keyword search across all platforms and models simultaneously by cancer type, model name, gene, drug treatment, or model location.
- Access model phenotypic and genotypic data, patient information, and growth curves.
- Manage your portfolio of model interests.
- Already accessible to any existing users of CrownBio databases via current log in details.
- Download our App to access model data on the go.
