

Public Library Printing

Personalized access helps employees and public

Situation

A public library has a color MFP located in the common area. Library employees have access to print color documents but the administration wants to control usage and costs. At the same time, library visitors are asking to use the MFP for printing as well, but the library administrators have no way to control internal usage and charge visitors for printing as a service.

Solution

Library employees receive access to print using their personal ID card at the device. To control internal use and cost, the library's IT administrator has the ability to create individual limits on color and monochrome printing for each employee. Visitors also gain access to the MFP using a pre-paid unique ID card and easy to use accounting software provides visibility of both employee and visitor printing activities.

Getting Started

Assess your customer situation. Do they have similar challenges?
Understand their technology requirements & current IT infrastructure.
Choose technology and implementation options from suggested technology required.
Decide how you prefer to monetize.

Technology Required

ConnectKey MFP

AAA SW (Authentication/ID card SW accounting features & print rules)
Analyst support for set up & configuration
