

Real Estate on the Go

Simplified scanning solution improves productivity

Situation

Real estate agents, in some cases by regulation, need to file a hard copy record of the customer Property Disclosure statements for timely and easy access from various branch locations. Current hardcopy filing process is manual, time consuming, prone to error and restricts access making it difficult to share client files.

Solution

Electronic filing and email notification via a customized multi-destination scan app on the Xerox MFP to a dedicated folder for each client listing, with the option to enter the client property disclosure ID as a filename and the email recipient.

Getting Started

Assess realtor situation and workflow challenges?
Understand current technology to support document storage or sharing.
Choose technology & implementation option from Technology Required.
Decide how you prefer to monetize and implement the solution.

Technology Required

ConnectKey MFP

Analyst support of set up and integration with realtors repository
Scanning software or Apps studio with PAB tools (depending on customer configuration) or contact an authorized developer
