

School Copy Job Shortcuts

Simplifying complex document output

Situation

Teachers in a school need to create study leaflets for their students. Typical leaflets consist of different media types, paper stocks, paper sizes, color or monochrome pages, finishing or other unique parameters. Since the regular copying process involves several steps and multiple devices settings, it's a complicated process. Teachers typically try several times before setting all details correctly which wastes time, paper and money.

Solution

Create an “one touch” application named “leaflet folder 8 pgr” the application makes all settings and starts the copying process. Any **ConnectKey** device can have several applications such as 5 copies with papers from 5 different trays, or any other combination of desired functionality.

Getting Started

Ask your customer if they do complicated copy jobs on a regular basis.
Explain the simplicity and benefits of a **ConnectKey** application
Decide how you prefer to monetize and implement the solution.

Technology Required

Xerox **ConnectKey** MFP

Foxway leaflet folder app

Analyst to set up the shortcut and design of the user interface

Customer Benefits

Simplifies complex copying process
Saves time with less waste
Less calls for service and user-help
