STANDARD FEATURES:

- Load Capacity: 1000 lbs.
- Hardwood plywood construction
- 3 Different height options available
- Pre-drilled holes
- Interlocking joints
- Reinforced internal support on larger plyo box
- Sanded edges for safety
- Boxes ship unassembled

PLYOBOX-202430

Our 3 in 1 wooden plyometric boxes are built out of hardwood plywood, and designed for strength and endurance training. Each box provides 3 different height options for you to choose from, simply flip the box to a different side and you're ready to go. Each box is built with pre-drilled holes, interlocking joints, and reinforced internal support on the larger plyo box. The edges have also been sanded down to reduce shin scrapes on missed jumps. The plyo boxes come shipped unassembled but can be ordered fully assembled for an additional charge.

STANDARD BOX:
