ELEVATING TREATMENT TABLE

ME2000
with options

This dynamic table was designed and built with the highest standards of quality, integrity and innovation. With its quiet and smooth elevation, the **ME2000 Elevating Treatment Table** eliminates the constant squatting and bending while treating patients, leaving you with more energy at the end of the work day. This table offers maximum storage with access on each side of the table.

FEATURES:

- 77" L x 28" W
- Height: 24" - 36"
- Lifting capacity: 400 lbs.
- Complete cabinet with 2 sliding doors on each side of the table and 1 foot pedal
- Flat 2" high density cushion with rounded corners and nose hole
- Lift back option available

ME2001

BARIATRIC ELEVATING TREATMENT TABLE

FEATURES:

- 84" L x 40" W
- Height: 24" - 36"
- Lifting capacity: 400 lbs.

With a wider top, the ME2001 Bariatric Elevating Treatment Table will give you the flexibility to work with patients of all sizes without compromising comfort.

ME2001

TREATMENT TABLES

19407

FEATURES:

- 30"W x 73"L x 31"H
- Load Capacity: 450 lbs.
- Solid hardwood legs
- H-brace construction
- Shelf • Rounded corners and nose hole
- 2" High density foam cushion
- 70° Manual multi-position elevating lift back

BASIC WOOD TREATMENT TABLE

Meet the next generation of cost-effective exam tables. Our **Basic Wood Treatment Table** is built to meet your needs and budget. Each table comes standard with H-brace construction, shelf, comfortable 2" high density foam cushion, 70° manual lift back with multi-position elevation and softly rounded corners. This table is the perfect fit for any treatment space. Some assembly required.

ESSENTIAL WOOD TREATMENT TABLE

Each table comes standard with a poplar hardwood frame, H-brace construction, comfortable 2" high density foam cushion, softly rounded corners and dual-bolted folding leg assembly for easy shipping. Make it your own by adding length, width, shelves or a cabinet that can be mounted on either end.

TEWT
with options

FEATURES:

- Lift back option available

CLASSIC WOOD TREATMENT TABLE

TESS
with options

FEATURES:

- 27" or 30"W x 72" or 78"L x 31"H
- Load Capacity: 550 lbs.
- Solid hardwood H-brace construction
- 2" High density foam cushion
- Rounded corners
- Dual-bolted leg assembly that folds down for convenient shipping
- Lift back option available

Custom build your wood treatment table to meet the specific needs of your practice. Make it your own by adding length or width, shelves or a cabinet that can be mounted on either end. Patient-friendly customizations include a nose hole and 70° manual lift back with 6 position elevation.

FESS-6L

Designed for greater stability, our **6 Leg Classic Wood Treatment Table** offers a rich variety of standard options as well as customizations. Tailor your table to your needs with an additional cabinet that can be mounted on either end or include a nose hole, 70° manual lift back with 6 position elevation and 45° split leg elevation.

CLASSIC 6 LEG WOOD TREATMENT TABLE

FEATURES:

- 30"W x 78"L x 31"H
- Load Capacity: 800 lbs.
- Solid hardwood 6 Leg construction
- 2" High density foam cushion
- Rounded corners
- Triple-bolted leg assembly
- Bottom shelf for added storage
- Lift back and split leg options available

PT9080

The flexible split leg design of this solid hardwood treatment table makes it extremely functional for multiple treatment positions. Each padded leg cushion can be manually adjusted to the desired hip and knee flexion positions making treatments easier and more comfortable for the patient and therapist.

FEATURES:

- 30"W x 81.5"L x 32"H
- Load Capacity: 800 lbs.
- Solid hardwood construction
- Dual brace support
- 2" High density foam cushion
- Rounded corners
- Manual lift back
- Elevating Back 0-70°
- Elevating Legs 0-90°
- Hip/Knee flexion
- Bottom shelf for added storage

FMST TOOLS

Fluid Motion Soft Tissue Tools are the soft tissue mobilization tools that can take myofascial manipulation and mobilization to the next level in your practice. The design of the two tools available enables you, the practitioner, to work over all surfaces of the body quickly and easily. The tools help reduce scar tissue problems from old injuries/surgeries and achieve greater results with pain control, joint and muscle flexibility.

FEATURES:

- Custom molded, non-slip thumb grips create maximum angular pressure without over use by the therapist.
- Ambidextrous design: no more switching through multiple tools to find the right edge or angle. Both tools are designed to be used on both sides and on every surface for increased compatibility of treatment on multiple body areas.
