

Transform data into your competitive advantage

Discover why so many insurers trust SpatialKey to make critical decisions at the point of underwriting.

Make decisions faster with self-serve analytics

Build a holistic view of risk, spanning multiple hazards, in a single interactive environment that puts analytics and data from industry-leading content providers at your fingertips.

Collaborate across departments with ease

Ensure shared understanding between Underwriting and Exposure Management teams with an enterprise solution that facilitates your team's ability to share insights and write business within your guidelines.

Immediately determine the impact on your portfolio

Easily evaluate risk within the context of your portfolio and claims history. Leverage your own data to avoid risk in areas where you've had substantial claims, manage within available capacity, and focus on building a healthier portfolio.

User spotlight

A large insurance company discovered they could have prevented two commercial claims totaling \$2 million. This valuable insight into their past claims costs is just one reason the company began using SpatialKey in multiple business units across several countries.

Save, share & file reports

- ✓ Analyze and visualize prospective risk, in a seamless environment that can be directly integrated with your policy system.
- ✓ Understand whether risks exceed underwriting guidelines and allocated capacity.
- ✓ Keep records of your decisions with in-depth risk reports—and easily share them with colleagues.

Our use of SpatialKey has improved the way we analyze and make underwriting decisions. We write new business with greater confidence and understanding of our flood exposure, creating competitive advantage and lower claims costs. - Colin Panzetta, Senior Class UW, XL Catlin
