

Personalized Security Awareness Training for Minnesota Service Cooperative Members

Just last year, phishing attacks led to 43% of data breaches. Other reports indicate 30% of your workforce can't identify a phishing email, putting organizations like yours at risk.

Teach your team how to spot cyber threats like phishing with SecurityIQ awareness training. SecurityIQ identifies your security-naive employees based on 18 behavioral metrics and delivers training targeted to their roles. It evolves with employees' security aptitudes and learning styles, creating personalized learning experiences that motivate behavioral change.

As a Minnesota Service Cooperative member, you can access SecurityIQ at an exclusive members-only rate. Your subscription includes:

- » 200+ interactive, gamified and role-based training models, including industry-specific compliance training for education, government and municipalities
- » Realistic anti-phishing simulations with 200+ templates
- » Data-driven program automation based on 18 behavioral metrics
- » Pre-made (and customizable) assessments to gauge lesson retention and engagement
- » Award-winning awareness posters and newsletters for offline reinforcement
