

Carrington Paving is pleased to announce its acquisition by 3D Facility Services, Inc., Mr. Dennick Skeels, President.

Founded in 2002, **Carrington Paving** is a full-service paving, concrete and exterior building maintenance company specializing in parking lot and other exterior repair. The company does the kind of maintenance work – pot hole patching, concrete repair, parking lot striping, bollard installation, sealcoating, brick repair, fence repair, etc. - that many other paving companies avoid. The company enjoys unusually high margins and limits its client base to multi-site commercial property owners. Clients include the US Postal Service, Wawa, The Bernstein Companies, St. John Properties, Arbys, Royal Farms, and Food Lion, among many others. The company has been growing at an exponential rate and its services are in strong demand.

Carrington often has more requests for work than it can handle. It rarely loses a customer and only takes on new clients when it has sufficient trained personnel to accommodate the additional work. Because of its commitment to quality, **Carrington** enjoys an intensely loyal customer base. Most of its new clients are referred to Carrington by its existing customers.

Mr. Skeels is excited to join the **Carrington Paving** team. He believes that with his experience in management and finance, he can help **Carrington** continue its pattern of strong growth into the future.

Prime Investments Business Brokers and M&A Advisors acted as intermediary in the transaction. Prime represents business owners in Pennsylvania, Delaware, Maryland, Virginia and Washington, DC. Prime's no-upfront fee policy, unusual in the M&A community, has proved attractive to business owners throughout the Mid-Atlantic region.
