Tyler Derritt Joins IdentiFlight International as Business Unit Manager

February 25, 2019 – [IdentiFlight International](#) is pleased to announce that **Tyler Derritt** has joined as IdentiFlight® Business Unit Manager. In his new role, Tyler will direct the project management of IdentiFlight's production, installation and commissioning, as well as supporting business development efforts.

Prior to joining IdentiFlight, Tyler led the project management team at Industrial Cooling Solutions, Inc. (ICS), a turnkey engineering firm providing cooling towers and water cooling equipment solutions to power plants and petrochemical plants across the United States and Southeast Asian markets. He led the rebuilding of the projects and design team with ICS, while aiding with operations management, managing the company's ISO 9001 quality control program and executing several turnkey projects.

Tyler earned his B.S. in Engineering Physics at the Colorado School of Mines and is a registered Professional Engineer in the State of Colorado. He can be reached at Tyler.Derritt@IdentiFlight.com or **720.545.9975**.

About IdentiFlight®

The IdentiFlight Aerial Detection System blends artificial intelligence with the high-precision optical technology to detect eagles. In an operating wind farm, IdentiFlight contributes to eagle conservation by helping protect them from collisions with rotating wind turbine blades. In wind project development, IdentiFlight helps in permitting sites by accurately quantifying eagle activity at prospective sites. Automatic detection and species determination occur within seconds for birds flying within a one-kilometer hemisphere around an IdentiFlight tower. The IdentiFlight system has completed real-world testing and validation in pilot programs at U.S. wind farms with elevated eagle activity and is now being deployed in projects across the U.S. and Europe.
