

Innovative, practical, proven engineering.

# AMG

Incorporated

**Mechanical • Instrumentation • Process • Electrical • Structural**

We understand that every client has unique processes and facility needs that require intimate knowledge. We work closely with our clients to understand each project's design and build requirements, leading discussions and providing recommendations on how to reduce costs and get the job done on time.

"I manage three air separation plants with a small team to support the semiconductor industry. The corporate office engineering support is 1,300 miles away and not licensed for our location. AMG provided timely, competent, licensed, and well-communicated engineering design services to support the replacement of obsolete equipment."

**Brandon Otto, MTV Plant Engineer at Air Liquide Electronics U.S. LP**

## TACTICAL PARTNER

- ▶ Aging facility repair, replacement, or retrofit projects
- ▶ Disaster recovery
- ▶ Unexpected situations
- ▶ Contractor default rescue projects

## STRATEGIC PARTNER

- ▶ Existing facility expansions
- ▶ Upgrades and integrated systems replacement projects
- ▶ New facility feasibility and design/build projects
