

SCAN-ONE-PRINT-ONE

FAST AND EASY BARCODE DUPLICATION

The Computype Barcode Duplicator is an intelligent print station that lets you scan and duplicate an existing laboratory barcode label in one step.

Applications include:

- › Sample relabeling
- › Sample aliquoting
- › Histology sample accessioning
- › Sample chain of custody

This stand-alone system includes a scanner, keyboard with display, and barcode printer. The scanner reads barcodes directly, and the keyboard allows you to add or modify label information before printing. It is compatible with labels used in demanding conditions, such as Computype Cryo Hold™. Small, affordable and easy to use, the Barcode Duplicator helps you track samples accurately and consistently while reducing time and effort.

SAVE LIVES, SAVE TIME, SAVE MONEY.

There's a lot of pressure put on the labels you use. If they don't perform well when it comes to readability, trackability and just hanging on, there's more at stake than just a missing label. With adhesives and materials that can withstand harsh environments, and barcode symbols that have been checked and double-checked, Computype's got you covered with products that perform.

LOOK TO US FOR ALL YOUR CRITICAL LABELING SOLUTIONS.

We work closely with you to provide the right labels to meet all your requirements. And not just the right labels, but everything for your labeling needs. From labels to printers, and scanners to label replication systems, Computype offers this and everything in between.

WE'D LOVE TO HEAR FROM YOU.
