DELMHORST RELEASES NEW MOISTURE METER PACKAGE FOR WOOD FLOORING PROFESSIONALS

TOWACO, N.J. — July 6, 2017 — Delmhorst Instrument Co., a leading U.S. manufacturer of moisture meters and thermo-hygrometers, offers an array of moisture meters for various flooring needs. With its recent release of the **TotalCheck Wood Package**, you have the tools the 3-in-1 TotalCheck meter has to offer along with a combination of electrodes and accessories for all your flooring jobs. Whether it's identifying a moisture problem on an installed floor, testing sub-floor prior to installation, or checking ambient RH and temperature conditions, the **TotalCheck Wood Package** has you covered. This package includes the following items to make your job easier:

- Total Check 3-in-1 moisture meter/thermo-hygrometer with carrying case
- 26-ES hammer type electrode – the standard for testing %MC through top floor and into subfloors
- 2-E electrode for testing prior to installation
- RHT-S/1 RH/temperature sensor with fast, accurate response time
- MCS-1 moisture content standard to verify calibration of pin meter
- (10) additional #496 insulated contact pins

"Delmhorst has the meter you need to make your flooring jobs easier. Assuring the wood flooring and subfloor is dry leads to fewer call backs and increased profits." said Paul Laurenzi, vice president of sales and marketing, Delmhorst Instrument Co.

Ongoing Flooring Moisture Matters Education

In addition to offering high-quality moisture meters, Delmhorst is committed to providing the industry with relevant, easy-to-access, educational resources. Our [Moisture Matters](#) blog and our [Complete Guide to Measuring Moisture in Flooring Systems](#) eGuide are always available, and include tips for everyone from the DIY enthusiast to professional contractors. Blog content includes using pin and pinless meters, measuring moisture in wood floors, and information on ASTM F2170 standard for measuring RH in concrete. We also invite you to visit our blog at [Moisture Matters](#) and leave a comment.

About Delmhorst Instrument Co.

For 70 years, [Delmhorst Instrument Co.](#) has been the leading manufacturer of American-made high-quality moisture meters and thermo-hygrometers. Delmhorst meters undergo independent third-party testing to meet rigorous standards. The meters are used for a wide variety of applications, including restoration, IAQ, flooring, woodworking/lumber, construction, agriculture and paper. Initially, Delmhorst sold one model to building superintendents in New York City to help them identify leaks in roofs and plaster walls. Today, the company serves more industries than all its competitors combined and is recognized as the market leader in each of those industries. For further information, contact Paul Laurenzi, vice president of sales and marketing for Delmhorst Co., at 877-DELMHORST (335-6467) or visit us at www.delmhorst.com for details on the entire line of products.
