

POWERFUL CORN SOLUTIONS FROM SIPCAM AGRO USA, INC.

Sipcam Agro's corn portfolio supports optimal broad spectrum weed control and disease protection to maximize yields and improve ROI.

SIPCAM AGRO
USA, INC.

Atrazine 4L

Flowable Herbicide

Active ingredient: Atrazine

Rate: 2 – 2.5 lbs./A

Packaging: 4L: 2 x 2.5 gal. case
90DF: 25 lb. bag

- Season-long control of annual grasses and broadleaf weeds
- Can be applied pre- or post-emergence
- Tank mix compatible with a wide variety of other herbicides, including glyphosate, as well as fluid fertilizers
- Available in flowable or dry flowable formulation
- Excellent addition to a Roundup Ready Corn Weed Control System

Atrazine 90DF

Dry Flowable Herbicide

Sim-Trol® 4L

Flowable Herbicide

Active ingredient: Simazine

Rate: 2 – 2.5 qt./A

Packaging: 4L: 2 x 2.5 gal. case
90DF: 25 lb. bag

- Pre-emergence control of most annual grasses and broadleaf weeds
- Tank mix compatible with a wide variety of other herbicides, as well as fluid fertilizers
- Available in flowable or dry flowable formulation
- Labeled for fall application
- Excellent addition to a Roundup Ready Corn Weed Control System

Sim-Trol® 90DF

Dry Flowable Herbicide

Quartz® 4L

Active ingredient: Mesotrione

Rate: 3 – 7.7 fl. oz./A

Packaging: 2 x 2.5 gal. case

- Excellent contact and residual control of difficult broadleaf weeds
- Convenient formulation allow for flexible application timing
- Outstanding crop safety
- Excellent tank mix compatibility, including glyphosate
- Excellent addition to a Roundup Ready Corn Weed Control System

Stalwart® C

Herbicide

Active ingredient: Metolachlor, Safener

Rate: 2 – 2.4 qt./A

Packaging: 260 gal. tote

- Pre-emergence control of annual grasses and small-seeded broadleaf weeds
- Can be applied before or after planting, but before weeds emerge, in all tillage systems
- Suitable for tank mixing with fluid fertilizers and other herbicides, including glyphosate
- Labeled for fall application
- Excellent addition to a Roundup Ready Corn Weed Control System

Stalwart® Xtra

Active ingredients: Metolachlor, Atrazine, Safener

Rate: 1.3 – 2.6 qt./A

Packaging: 2 x 2.5 gal. case, 260 gal. tote

- Provides extended broad-spectrum residual control of annual grasses and small-seeded broadleaf weeds
- Can be applied before or after planting, but before weeds emerge, in all tillage systems
- Suitable for tank mixing with fluid fertilizers and other herbicides, including glyphosate
- Excellent addition to a Roundup Ready Corn Weed Control System

Stalwart® 2W

Active ingredients: Metolachlor, Mesotrione, Safener

Rate: 2 – 2.4 qt./A

Packaging: 260 gal. tote

- Two active ingredients provide long-lasting, residual control of tough annual grasses and broadleaf weeds
- Can be applied pre- or post-emergence
- Excellent mixability, compatible with many other active ingredients, including glyphosate, offering flexibility and efficiency
- Superior storage stability
- Excellent crop safety
- Excellent addition to a Roundup Ready Corn Weed Control System

Stalwart® 3W

Active ingredients: Metolachlor, Mesotrione, Atrazine, Safener

Rate: 3 – 3.5 qt./A

Packaging: 260 gal. tote

- Excellent grass and broadleaf weed control in one convenient solution
- Early reduction of weed pressure results in greater yields
- Wide application window provides application flexibility, saving time and money
- Multiple modes of action minimize risk of weed resistance
- Excellent crop safety
- Superior mixability and storage stability
- Good tank mix partner with glyphosate
- Excellent addition to a Roundup Ready Corn Weed Control System

FUNGICIDES

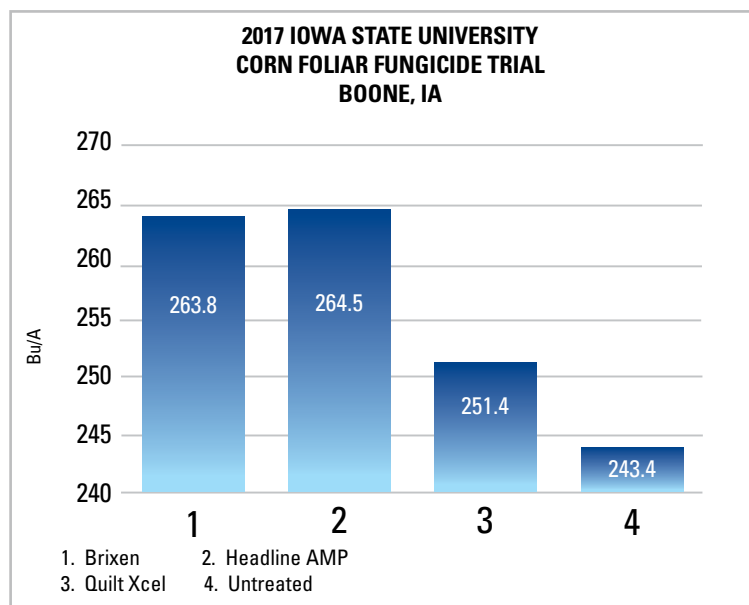

Brixen™ Fungicide

Active ingredients: Tetraconazole, Azoxystrobin

Rate: 13 – 19 fl. oz./A

Packaging: 2 x 2.5 gal. case

- Excellent choice for Gray leaf spot, Rust and Blight
- Broad spectrum preventative and curative fungicide with systemic properties
- Features two modes of action for excellent disease resistance management

Andiamo[®] 230 Fungicide

Active ingredient: Tetraconazole

Rate: 4 – 6 fl. oz./A

Packaging: 2 x 2.5 gal. case

- Excellent choice for Gray leaf spot, Rust and Blight
- Highly compatible with other fungicides
- Provides preventative and curative activity
- Easy to mix in low volume of water and compatible with other fungicides, making it a flexible addition to fungicide programs

Arius[™] 250

Active ingredients: Azoxystrobin

Rate: 13 – 19 fl. oz./A

Packaging: 2 x 2.5 gal. case

- Preventative fungicide with systemic and curative activity
- Long-lasting, broad spectrum control
