EMPOWERING BYSTANDERS to help save lives with PlusTrac

There is a need for bystanders to play a more active role in responding to emergencies and with Mobilize Rescue System they can.

No organization is too large, or too small, to benefit from PlusTrac™ Mobilize Rescue System.

Even though the number of Mobilize Rescue Systems installed continues to grow, increasing the number of survivors requires more than just kits. The status of your kits needs to be tracked, people need to know where they are located, and trained responders need to be ready and available. Managing your Mobilize Rescue System with PlusTrac™ is scalable and simple—no matter how many kits are in your program.

Complex Organization? No Problem.

When you set up your Mobilize Rescue program, you will have to know who will be trained and who will be maintaining the kits. That can become a significant problem in a large organization. Who manages training in each facility? At the next level of your organization, who manages those managers across facilities? Who inspects your inspectors?

No matter how complex your organization, PlusTrac™ can help make managing it easy. Multiple layers of management can easily view their area, or areas, of responsibility on a single screen that shows the current state of their program. Something needs attention? Get the precise details you want, when you want them, with just a few key strokes.

Design and Schedule Your Program.

The standard reporting available in PlusTrac™ can be customized for your organization. Go ahead and change it to collect current program data the way you need it, and present it the way you prefer.

You can even schedule email reports as needed: daily, weekly, or monthly. No need to log into PlusTrac™ to stay informed. Want to know more? You can easily log in to investigate any detail requiring attention.

PREPARING FOR THE UNEXPECTED IS SIMPLE with the Mobilize Rescue System.

Readiness

Alerts/Notifications	E-mail alerts and notifications sent 90/60/30 days prior to product expiration
Tracking/Reporting	E-mail reminders, reports, and dashboard charts prompt for required manufacturer/regulatory maintenance

Compliance

Mobilize Maintenance Schedule	Automate messages to help maintain the recommended charging schedule
Recommended Inspections	Routine reminders to maintain the inventory quantities to be prepared for an emergency

Support

Customer Support	Immediate-response online chat and help desk ticket system
Data Entry/Batch Upload	Assistance with data entry/batch upload of all Rescue System program data
FDA/Manufacturer Recall Alerts	Device-specific notifications by serial number entered into PlusTrac and sent by e-mail

Need More?

Some larger programs with multiple units, possibly in several locations, need extra support. Do you need pre-staged products from your manufacturer delivered on a specific training date? Do you need help collecting data about existing kits in service that are converting to PlusTrac? We can provide premium services, if needed. Ask your ZOLL representative for information about services not shown here.
