

PlusTrac AED Management

OUR PROGRAM, YOUR GUARANTEE

Automated External Defibrillator Program Specifications

Readiness Counts

The PlusTrac™ AED Program Management System from En-Pro™ Management, Inc. enables your AED program with everything your organization needs to manage all of your AEDs online. PlusTrac makes it easy to keep your AEDs inspected, your consumables up to date, your volunteer responders trained, and all of your AEDs properly managed and rescue ready.

Compliance Matters

PlusTrac will maintain a complete record of your Good Samaritan status and keep you in constant contact with the manufacturer of your AED, along with the many local, state, and federal agencies whose regulations may affect keeping Good Samaritan status.

Our Program, Your Guarantee

Every person in your organization who needs to have status updates on some or part of your AED program will know what they need to know, when they need to know it. Early warnings, reminders, and Good Samaritan status updates will keep everyone informed—from the general manager to the single volunteer responder. Managers can tailor PlusTrac to deliver the reports they want. PlusTrac makes it easy to manage your compliance and readiness.

Are your AEDs ready and compliant?

- When will you need to replace the pads and batteries on your AED?
- Can you provide a recorded history of the required monthly maintenance inspections?
- Do you have access to and are you in compliance with all federal, state, and local laws?
- Did you notify the local EMS agency of the location and type of AED you have?
- Is there a copy of the Medical Authorization by a licensed medical director on file?
- How will you retrieve the data and submit the reports when you use your AED?

If you said no to any of those questions or need someone to call, consider PlusTrac Professional.

Complete access to PlusTrac for each AED and complete program management. (Live customer support for designing, implementing, and maintaining your program. Includes loading data, troubleshooting, indemnification, and launching program.)

Professional Program Specifications

Readiness

Program Launch Event	Conference call with users to establish roles and responsibilities, and provide PlusTrac training
Implementation Plan	Detailed plan for AED program deployment and activation with site-specific compliance/readiness timeline
Alerts/Notifications	E-mail alerts and notifications sent 90/60/30 days prior to pad and battery expiration
Tracking/Reporting	E-mail reminders, reports, and dashboard charts prompt for required manufacturer/regulatory maintenance

Compliance

Prescription/Medical Oversight	AED prescription + Medical Director (physician) assigned to provide, review, and approve rescue protocols
Agency Notification/Registration	En-Pro completion and submission of all agency notifications/registrations
Online File Cabinet/Resource Library	Access to online library of legal and regulatory requirement documents
Compliance Guarantee Documentation	Develop and maintain all documentation needed to meet and exceed local requirements for Good Samaritan protection, including statement of indemnification

Support

Customer Support	Immediate-response online chat, telephone customer support, same-day e-mail, or help desk ticket system
Data Entry/Batch Upload	En-Pro-supported data entry/batch upload of all AED program data
FDA/Manufacturer Recall Alerts	Device-specific notifications by serial number entered into PlusTrac and sent by e-mail
Post-Event Review/Loaner AED	After event, En-Pro sends user loaner AED; user sends En-Pro AED used in rescue. En-Pro retrieves event data and returns AED to user with event data report and physician's review

Need More?

Some large AED programs with multiple units, possibly in several locations, need extra support. Do you need pre-staged products from your manufacturer delivered on a specific training date? Do you need help collecting data about AEDs already in service that are converting to PlusTrac? En-Pro can provide premium services, if needed. Ask your En-Pro representative for information about services not shown here.
