

This Isn't Science Fiction

It's PlusTrac Data Security

PlusTrac understands that data threats abound in an increasingly digital world. That's why we've partnered with EATEL Business -- provider of Tier 3 Data Center services.

That means your data is kept safe in a vertiable sci-fi data fortress. It's like a Death Star, with no exhaust port. It's like The Matrix, with no Agent Smith. It's like The Enterprise, with no Tribbles. You get the picture.

Here's what EATEL Business data centers offer to PlusTrac AED Management clients:

- Connectivity is multi-homed across geographically diverse internet providers.
- Fully redundant enterprise-class firewall and network infrastructure.
- 24/7/365 Network Operations Center (NOC) provides robust monitoring and "remote-hands" support to clients.
- Physical security includes bullet-proof walls and doors, 24/7 on-site security personnel, monitoring, video surveillance, biometric scanners, and card access and mantrap access to the data center floor.
- Fully redundant enterprise-class firewall and network infrastructure.
- Redundant environmental control and fire protection via a non-water based FM200 fire suppression system
- Air handling systems and UPS circuits to each rack. Carrier-grade power-to-rack options capable of supporting the most power-hungry IT infrastructure.
