

ID Verifact, Secure, digital asset transfer at your fingertips

When there's a need for the safe, secure, and fast transfer of personal information between consumers, institutions, and businesses, Prodigy Labs is the go-to solutions provider. Trusted by many leading financial institutions and organizations throughout North America, we design revolutionary fintech solutions that enable our clients to leverage digital identity transactions safely and securely. Thanks to our extensive fintech experience and our unique insights into Verified.Me by SecureKey Technology Inc., we've developed ID Verifact, a proprietary toolkit of accelerators that expedite the deployment of the technological infrastructure that clients need to participate in the Verified.Me network. ID Verifact's toolkit speeds the market adoption of secure digital identity solutions for banking, payments, insurance, retail, charitable donations, and other uses.

ID Verifact makes the complicated easy

Designed to orchestrate and accelerate implementation and adoption, ID Verifact transforms the complex into manageable, while reducing costs and increasing time-to-value. Our toolkit works seamlessly with third-party ID verification networks including, Verified.Me, to facilitate the optimization of digital identity solutions. With ID Verifact, organizations can quickly optimize digital identity solutions and take advantage of market opportunities by speeding the onboarding and adoption of digital identity networks.

Enterprise tools speed onboarding and adoption while driving revenue

With a proprietary toolkit of enterprise interfaces, analytics, services, connectors, and adapters that are

scalable, configurable, and customizable, the ID Verifact toolkit speeds time to adoption and, ultimately, revenue generation. With its multi-tenancy, secure digital identity platform and associated services for numerous initiatives, including new account creation, digital signature, account maintenance and recovery, and eligibility checks, ID Verifact's toolkit facilitates convenient and secure account linking, even within voice applications.

Many applications, one solution

ID Verifact's toolkit speeds the market adoption of secure digital identity solutions for banking, payments, insurance, retail, charitable donations and other uses, and works with a wide variety of digital payment and digital identity verification networks.

When it just has to be right, trust Prodigy Labs. Let us plan, deploy, and operate the technical infrastructure to become a Digital Asset Consumer (DAC), a Digital Asset Provider (DAP), or a Digital Lock Box Provider (DLBP). With our proprietary toolkit of accelerators and experienced professional services team, Prodigy Labs accelerates your time to value.

About Prodigy Labs
