

Case Study

ICORENE® 1060 (ESF)

Enhanced Surface Finish

Design and outdoor furniture

Features:

- *No surface pinholing*
- *Good flow*
- *Easy processing*
- *Good physical properties*
- *Hygienic or medical environments*

Description:

Outdoor furniture is exposed to weathering, dirt and abuse. Rotomoulded PE shows up some imperfections of surface pinholing which traps the dirt and is very hard to remove.

Solution:

ICORENE® 1060 ESF is specially formulated grade containing an additive that eliminates surface pinholing. When the furniture becomes dirty, the product can be easily cleaned with detergents and water, without leaving dirt particles trapped on the surface.

Result:

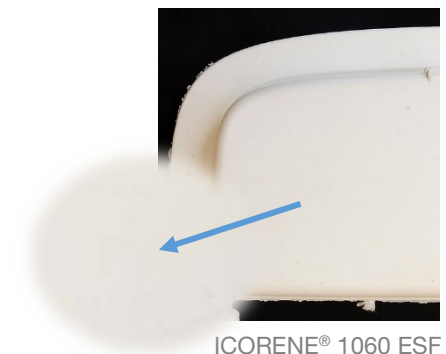

An enhanced surface finish improves the looks and quality of the moulded furniture for many years.
