

# LiveData PeriOp Manager

Coordinated Teams • Predictable Outcomes

**LiveData PeriOp Manager™** integrates real-time data with workflow automation to coordinate and manage patient care throughout the perioperative suite. From preoperative assessments through surgery to discharge, PeriOp Manager provides operational status and notifications for each step of care. Real-time case and patient status are shown on wall-mounted screens throughout the perioperative suite, including preop, operating rooms, PACU, control desk, SPD, staff lounges, and locker rooms. As a web-native application, PeriOp Manager can also be accessed on tablets and desktops using secure hospital networks.

Manage the dynamic environment of the perioperative suite:

- See more cases, run more smoothly, reduce overtime, and decrease waste
- Deliver higher quality and safer patient care
- Enjoy happier patients, families, and perioperative staff
- Produce measureable results

**PeriOp Manager includes:**

## LiveData PreOp Board™

PreOp Board is a dynamic checklist combined with a single real-time operational view of patient status and preoperative case workflow. For each case, PreOp Board displays patient, procedure, and staff names; OR room readiness; and patient care milestones that include Antibiotic Status, H&P Complete, Consent, Site Marked, Lab Status, Blood Availability, EKG, Nurse Assessment, Anesthesia Assessment, and Patient Ready for OR.

- Optimize preoperative workflow
- Improve on-time starts
- Manage clinical resources

## LiveData OR-Dashboard™ with Active Time Out®

OR-Dashboard with patent-pending Active Time Out integrates patient data from hospital medical records and physiological monitoring devices with automated surgical workflow and patient safety processes to display the information on large wall-mounted screens in the OR. Active Time Out integrates and automates the surgical safety checklist into the surgical workflow.

- Improve patient safety by achieving durable surgical time outs
- Reduce never events and wrong site surgeries
- Improve surgical efficiency and surgical quality
- Enhance surgical team communication

## LiveData OR-Schedule Board™

OR-Schedule Board is a dynamic, real-time view of the day's surgical caseload. It automatically adjusts case start and end times based on real-time case workflow monitoring, and provides interactive tools to automate OR assignment and clinical staffing on the fly.

- Reduce unused "prime time" surgical minutes
- Communicate real-time updates
- Reduce unplanned overtime
- Improve turnover time
- Create surgical capacity and increase utilization/access
- Proactively manage the end of the day

## LiveData Patient Flow™ and LiveData Family Waiting Board™

Patient Flow integrates the patient check-in and check-out process into perioperative workflow enabling patient status to be viewed by preoperative and surgical team members as well as patient families. Family Waiting Board allows families to track the progress of their loved ones as they move through the perioperative process. Patient location information is displayed on large screen monitors in a HIPAA-compliant manner.

- Automate the surgical patient check-in and check-out process
- Automatically share patient status throughout the perioperative suite
- Visually keep family members up to date on patient progress
- Perioperative staff do not have to search for patient status information
- Reduce family member anxiety and allow clinicians to focus on patient care

## LiveData PACU Board™

PACU Board is a dynamic checklist combined with a single real-time operational view of patient status and post-anesthesia case workflow. For each case, PACU Board displays patient/procedure/staff, inpatient room readiness, patient milestones, and patient readiness for discharge.

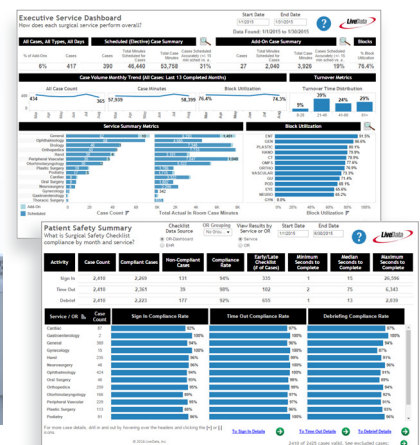

- Transform PACU workstyle from reactive to proactive
- Improve coordination and patient handoffs
- Optimize post-surgery workflow and clinical resources

## LiveData PeriOp Manager Analytics™

PeriOp Manager Analytics delivers comprehensive data analytics, using big data techniques to transform real-time operational data into actionable quality, compliance, and efficiency intelligence.

- Capture and visualize operational, patient safety, and quality metrics
- Explore performance data when and how you want it
- Assess the results of changes with an easy-to-use intelligence tool
- Use data detailed to the individual case level to make actionable decisions

**About LiveData** – LiveData PeriOp Manager real-time workflow automation coordinates and manages the patient's care on his or her journey through the perioperative suite. From preoperative assessments through surgery to discharge, PeriOp Manager helps surgical teams improve communication, patient safety, and operational efficiency.
